## SEWER DEDUCT METER APPLICATION

Upon application for installation of a sewer deduct meter, the Mayor may permit the installation by the customer of a US gallon meter to measure the quantity of water being used outside and not entering the municipal sewer facilities. To receive this deduction to the sewer charge, it will be the customer's responsibility to report this reading by the 25<sup>th</sup> of each month to the billing clerk. In no event can this deduction be applied to produce a sewer bill for an amount less than the current minimum sewer bill.
