120 EMS Responses

66 Fire Responses

Of those, there were:

9 Overdoses

15 Motor Vehicle Accidents

Air Medical was utilized 3 times

We had a semi fire in Richwood, in front of the TA truckstop

The semi was hauling 45000lbs of Butyl Acrylate.

Butyl acrylate is used in paints, sealants, coatings, adhesives, fuel, textiles, plastics, and caulk.

It is highly reactive and polymerizes easily when exposed to heat or peroxides

The fire started on the outside of the cab, due to a mechanical failure.

Our crews arrived on scene within minutes and contained the fire to cab. The tanker and its contents were never compromised due to the fast response and extinguishment.

Last Friday we were called to a dumpster fire at the middle school. The Fire was contained to a large construction dumpster and the Students were never in harms way.
